

3M™ Trizact™ Stone Floor Protection System

Protection that shines.

Restore with precise, fast-cutting 3M™ Trizact™ Diamond HX Discs. Protect from staining, scratching and black marks with Scotchgard™ Stone Floor Protector. Maintain the brilliant shine with Scotch-Brite™ Purple Diamond Floor Pad Plus and Tennant *True*® Neutral pH Daily Cleaner.

3M™ Stone Floor Protection System— A Complete Floor Care Process

Experience the benefits of innovation with the 3M™ Stone Floor Protection System—a complete floor care process that restores the natural beauty of your porous stone and produces a remarkable, long-lasting shine. The system has everything you look for in floor care. It's easy to use, needs no stripping or deep scrubbing, and creates a high traction gloss that can help reduce slips and falls. **That's 3M™ and Tennant® at work for you.**

Bring back the natural beauty of your floors with **3M™ Trizact™ Diamond HX Discs**

Give marble, terrazzo, polished concrete and other porous stone floors new life with 3M™ Trizact™ Diamond HX Discs. Featuring proprietary 3M™ technologies and manufacturing techniques, these advanced abrasives leave exceptionally consistent scratch patterns, maximizing efficiency and reducing the number of steps in the restoration process.

- Uniform cutting surface stays sharp and effective through the life of the discs
- Wet process does not create dust
- Compatible with standard floor cleaning equipment (low speed rotary and automatic scrubber)

Create a high traction shine with **Scotchgard™ Stone Floor Protector**

Every year, poorly maintained floors are responsible for more than two million customer and employee fall injuries. The result is billions of dollars in medical, insurance and litigation costs.¹ In just two coats, Scotchgard™ Stone Floor Protector creates an NFSI-Certified “high traction” surface that can help prevent slips and falls. What's more, you get a long-lasting, glossy, natural-looking floor that is less susceptible to scuffs, black marks, stains and scratches.

- No stripping or deep scrubbing required, eliminating operator exposure to and environmental release of potentially hazardous stripping chemicals
- Easy to spot repair damaged areas
- Unique hybrid technology that densifies, increases hardness and improves wear

¹Consumer Product Safety Commission

Take the guesswork out of maintenance with **Scotch-Brite™ Purple Diamond Floor Pad Plus** and **Tennant True® Neutral pH Daily Cleaner**

Floor maintenance is about finding the right tools and supplies to give you the best possible results. Designed to work together, Scotch-Brite™ Purple Diamond Floor Pad Plus and Tennant True® Neutral pH Daily Cleaner help you easily maintain the premium, shiny appearance you've created with the 3M™ Stone Floor Protection System.

- Proven compatibility; no-residue formula will not cloud or dull the floor
- Pads are available in numerous sizes
- When used as a complete system, improves productivity and reduces operational costs

Scotchgard™ Stone Floor Protector has been certified by the National Floor Safety Institute as providing “high traction.” A wet static coefficient of friction (SCOF) of greater than 0.60 was chosen by NFSI as the criteria for “high traction” because according to NFSI, floor surfaces maintaining this level of slip resistance when wet have proven to reduce slip-and-fall claims by between 50% and 90%.

RESTORE

Follow these simple steps to restore your floors to a glossy, long-lasting, easy-to-maintain finish

1. Select the right abrasive pad: For heavily damaged floors, where there is visible wear or scratches, use 3M™ Trizact™ Diamond HX Discs Gold; for less damaged floors, use 3M™ Trizact™ Diamond HX Discs Red.
2. Attach four 3M™ Trizact™ Diamond HX Discs to a 3M™ Red Buffer Pad 5100 in the 12:00, 3:00, 6:00 and 9:00 positions.
3. Make 5 passes with the 3M™ Trizact™ Diamond HX Discs with squeegee up and solution on. Make a final 6th pass with squeegee down.
4. If 3M™ Trizact™ Diamond HX Discs Gold were used in steps 1-4, attach four 3M™ Trizact™ Diamond HX Discs Red (red backing) to the 3M™ Red Buffer Pad 5100 in the same positions. If 3M™ Trizact™ Diamond HX Discs Red were used in steps 1-4, skip to step 6.
5. Make 3 passes with the 3M™ Trizact™ Diamond HX Discs Red with squeegee up and solution on. Make a final 4th pass with squeegee down.
6. Repeat steps 2 & 3 with 3M™ Trizact™ Diamond HX Discs Blue (blue backing) and a new 3M™ Red Buffer Pad 5100.
7. Clean the floor with an autoscrubber and water using the 3M™ Red Buffer Pad 5100 to remove any residue.
8. Make 4 passes using a burnisher and the Scotch-Brite™ Purple Diamond Floor Pad Plus.
9. Dust the floor using the 3M™ Easy Trap Duster.

PROTECT

Protect the natural brilliance of your stone floors with just two coats

1. Wet the 3M™ Easy Shine Applicator Pad with 3M™ Stone Floor Protector and apply a thin, uniform coat to the floor using the 3M™ Easy Shine Applicator System. Allow 15 to 30 minutes to dry. Burnish the floor 6 times with the Scotch-Brite™ Purple Diamond Floor Pad Plus.

Note: If scratches occur between reapplications, a quick burnish with the Scotch-Brite™ Purple Diamond Floor Pad Plus will restore the appearance. When it's time to recoat, simply clean the floor and reapply—no need to strip or deep scrub. 3M™ Stone Floor Protector creates a hydrophobic surface that resists water, stains and dirt, so finished floors are easily cleaned by dusting and wet mopping.

MAINTAIN

Daily Cleaning

1. Damp mop or autoscrub with the 3M™ Red Buffer Pad 5100 using Tennant True® Neutral pH Daily Cleaner.

Burnishing & Recoating

1. Burnish the floor with Scotch-Brite™ Purple Diamond Floor Pad Plus, dark purple side down. A suggested burnishing schedule*:
Low Traffic Areas: 1-2x/month | Medium Traffic Areas: 3-4x/month | High Traffic Areas: 1-2x/week
2. Recoat floors using a single coat of Scotchgard™ Stone Floor Protector. A suggested recoating schedule*:
Low Traffic Areas: 1x/year | Medium Traffic Areas: 1-2x/year | High Traffic Areas: 2+x/year

Note: To ensure proper slip resistance, flooring should be cleaned regularly to keep dust, sand, oils and other contaminants off the surface. DO NOT use acidic cleaners, cleaners that contain citrus (d-limonene), 2-butoxyethanol (butyl cellosolve), amine-based cleaners, isopropyl alcohol, solvent-based cleaners, degreasers or non-neutral cleaners. DO NOT use spray buff products or chemical dust mop treatments. Customers without burnishing equipment should use the Scotch-Brite™ Sienna Diamond Floor Pad Plus prior to Scotch-Brite™ Purple Diamond Floor Pad Plus if 3M™ Trizact Diamond HX Discs are not used during the restorative process.

*Minimum recommendation for optimum appearance.

Products and Ordering Information

INFORMATION & APPLICATIONS		SIZE	ITEM #	QTY.		
RESTORE
